

Novade Launches Digital Solutions to Mitigate On-site COVID-19 Risks

Ensure safety and productivity with COVID-Safe Site

LONDON, 27 November 2020 – Novade, a leading smart field management software developer for the building and construction industry, is launching COVID-Safe Site, a set of digital solutions to specially mitigate on-site COVID-19 risks. This launch rides on the successful control of coronavirus infections in Singapore, with Novade's technology helping to efficiently manage operations on-site, keep employees safe while maintaining productivity and reassuring stakeholders.

The new Novade COVID-Safe Site encompasses a comprehensive set of digital tools to efficiently manage health and safety across the worksite. The range of functionalities allows clients to rapidly and safely manage site operations, conduct health checks and enforce social distancing. The Novade platform can be integrated to track contact on-site and corresponding risk exposure. The platform also enables digital contactless site processes such as induction, toolbox talks, inspections, work allocation, and progress tracking which minimises the flow of paper on-site and provides remote visibility for businesses.

David Morin, Eiffage International Director and a user of Novade shared, "The Novade platform has enabled us to have real time visibility on our production metrics, equipment utilisation, materials consumption and workforce deployments. With constantly evolving restrictions, we have remote visibility and comprehensive data on site productivity. This is critical for our international business."

Novade has recently been deployed by Costain Group on its £150m upgrading project of Gatwick Airport station for Network Rail. The project team has worked safely and efficiently through the pandemic to bring much needed improvements to the station and improve the passenger experience.

As Novade establishes its presence in the UK, Tejas Thomas, UK country manager, commented, "COVID-19 forces companies to be flexible and diligent in order to maintain

productivity, while staying compliant with the evolving HSE requirements. Novade COVID-Safe Site will help companies seamlessly adapt to ensure sites remain safe and productive, offering a streamlined, digital process which can make the day-to-day management of their businesses easier and more effective."

Novade's UK office is located at Becket House, 1 Lambeth Palace Road, C/O CCFGB, London, England, SE1 7EU. Find out more about Novade at www.novade.net.
